

SURVIVE CHRISTMAS WITH THESE 10 CHOCOLATE TREATS

Chocolate is the ultimate comfort food, a guilty pleasure perhaps, and the good news is that the right kind of chocolate can actually be good for you... In this guide, I'm going to explain why and also share with you some of my favourite healthy recipes, so you can get your chocolate hit without a side order of guilt.

Chocolate comes from the cocoa bean, which literally means 'food of the gods'. And, historically, chocolate was so prized, cacao seeds were used as a form of currency (and, of course, some enterprising sorts even found a way to make counterfeit cocoa). It turns out those Mayans and Aztecs knew a thing or two because modern scientific research is finding new ways in which chocolate - good quality chocolate, at least - can be worth its weight in gold when it comes to your health.

The healthiest forms of chocolate are dark chocolate (70% cocoa content or higher) and cacao nibs, the original, natural form. (Just in case you are wondering, there are no health benefits for milk or white chocolate, and any of the other processed sweetened stuff.) Here's what the 'good' type of chocolate can do for your health.

FIGHTS AGAINST DISEASE

Dark chocolate and cacao nibs are high in antioxidants, which help fight free radicals that can damage the cells in your body. Two groups of antioxidants found in dark chocolate are flavonoids and polyphenols - and they're found in greater amounts in chocolate than either tea or red wine. The higher the percentage of cocoa in your chocolate bar, the greater the number of antioxidants.

GOOD FOR HEART HEALTH

Research also shows the flavonols in dark chocolate have a positive effect on heart health by lowering blood pressure, improving blood flow to the heart and making blood less sticky and able to clot.

MAY HELP LOWER CHOLESTEROL

The polyphenols in chocolate are thought to be involved in cholesterol control, potentially lowering both total and LDL ("bad") cholesterol.

BETTER BRAIN FUNCTION

Eating chocolate also increases the flow of blood to the grey matter in the brain. It's been suggested that cocoa flavonols would benefit conditions associated with reduced blood flow to the brain, including dementia and stroke. A study of the elderly that looked at consumption of flavonols (in dark chocolate, tea and red wine) lead to better cognitive function.

MAKES YOU HAPPY

The essential amino acids in dark chocolate help increase the production of the happy hormone serotonin, which can help alleviate feelings of anxiety and depression. Chocolate also contains the chemical phenylethylamine, which occurs naturally in your body and gives you the same boost you feel when you fall in love!

THE HISTORY OF CHOCOLATE

The use of chocolate dates back thousands of years. The Mayans were the first to discover its powers. They worshiped the cocoa tree and called the chocolate (or xocolatl) they created from it the 'food of the gods'.

The Mayans used it for a myriad of purposes, including making from it a ceremonial drink of ground cocoa beans, vanilla and other spices, such as chilli. Cocoa was highly valued for its healing and medicinal properties. The Mayan chocolate was very different from the chocolate we know today - not least because it contained no sugar. Spanish explorer Christopher Columbus brought cocoa beans back from his travels in the Americas in the 16th century. No one was particularly impressed, and the Spanish kept the cocoa bean to themselves for decades. Once cocoa started catching on, Spanish cooks experimented with the recipe and added sugar to sweeten it.

By the 17th century, it had made its way to France and the court of king Louis XIII and, in 1615, David Chaillou was given a 'royal authorization' to open the first chocolaterie in Paris. In 1657, chocolate made its way to Britain. Chocolate was still enjoyed pretty much the way the Mayans made it right up until the Industrial Revolution, when the cocoa press (that could separate the cocoa butter from the powder we now call cocoa) was invented. A number of other new processes also made the chocolate creamier, smoother and tastier. The world's first chocolate bar was created in 1847. And the rest, they say, is history.

HEALTHY HOT CHOCOLATE

1 cup/ 250ml almond milk
1 tbsp raw cacao powder (or unsweetened cocoa)
1 teaspoon pure maple syrup
1/2 teaspoon vanilla extract
a pinch of salt

Put all the ingredients in a saucepan over high heat and stir using a whisk, breaking up any lumps as you go.

Photo credit: American Heritage Chocolate @ Unsplash

FRUIT & NUT FLORENTINES

350g dark chocolate

lightly toasted nuts, seeds, unsweetened coconut chips and dried fruit to decorate

pinch of sea salt

Line a baking sheet with parchment.

Melt the dark chocolate by filling the bottom of a saucepan with couple of cms of water and bring to a simmer over a medium-high heat. Put the chocolate in a glass bowl and set over the simmering water, stirring occasionally.

Prepare a large baking tin (or two) with parchment paper. Once melted, use a teaspoon to drop a little of your melted chocolate onto the baking paper.

Scatter over the remaining ingredients (you can add a pinch of dried chillies if you're feeling brave) and chill in the fridge until the chocolate sets (about 30 mins). Peel off the parchment and break into pieces. Store in an airtight container for up to a month (if it lasts that long).

LOW CARB CHOCO FRUIT CLUSTERS

100g dark chocolate
15g dried cranberries
25 ready to eat apricots
40g pecan nuts
5 Nairns rough oatcakes
2 tsp raw cake sugar
40g flaked almonds

Melt the chocolate in a glass bowl set in shallow water over a low heat.

Blend all ingredients (except almonds) in a food processor until roughly chopped.

Add the blitzed mixture and the almonds to the melted chocolate and coat thoroughly.

Spoon into 10-12 cake cases and chill in fridge until set.

A top-down view of various fruits dipped in dark chocolate, arranged on a dark blue, textured surface. The fruits include slices of pear, orange, banana, and star-shaped pieces of fruit. The chocolate coating is thick and dark, contrasting with the light-colored fruit. The background has a mottled, painterly texture.

CHOCOLATE DIPPED FRUIT

Melt 200g dark chocolate by filling the bottom of a saucepan with couple of centimetres of water and bring to a simmer over a medium-high heat. Put the chocolate in a glass bowl and set over the simmering water. Let the chocolate melt, stirring occasionally, until no more lumps remain. Remove the bowl with the chocolate from heat.

While the chocolate melts, line a large tray with baking parchment. Almost any fruit works, including bananas, pears and orange slices as well as strawberries and cherries. Wash your fruit and pat dry well before cutting up into slices - when fruit is wet, it's much harder for the chocolate to stick. Dip a third of the fruit slices into the chocolate and place on the parchment to set.

Option: sprinkle with unsweetened desiccated coconut or chopped nuts.

COCO-CHERRY BLISS BALLS

125g ground almonds
1 tbsp ground flaxseeds
10 Medjool dates with stones removed (normal dates are fine, but Mejool are nicer)
100g unsweetened dried cherries
60g melted coconut oil
60g raw cacao
2 tbsp maca powder
2 tbsp sour cherry juice concentrate (like Cherry Active)
1/2 tsp almond extract
Unsweetened shredded/ desiccated coconut

Blitz the cherries and dates in a food processor until finely chopped.

Add the rest of the ingredients and continue to blitz until it starts to form a dough.

Roll into small balls and coat with shredded coconut. Freeze to firm up.

CHOCOLATE & BANANA 'NICE' CREAM

(makes 2 servings)

2 bananas, chopped and frozen

1 tbsp cocoa powder or raw cacao

If your family traditionally have ice cream around Christmas - this is your healthier replacement. Experiment with additions of vanilla essence, coconut cream (adding creaminess) and replacing the banana with other fruits.

.When ripe frozen bananas and cocoa powder are combined together in a blender you get a creamy, guilt-free, scrumptious frozen treat.

Put the frozen bananas in a food processor and pulse until smooth.

When the mixture is smooth, add the cocoa powder and blend until incorporated.

For a soft ice cream, serve immediately. For a firm chocolate banana ice cream, transfer it back to the freezer for at least an hour.

RAW CHOCOLATE MOCHA TART

450g cashews
2tbsp coconut oil
1tbsp espresso, finely ground
1/2 tsp sea salt
4 tbsp maple syrup
85g cacao powder
245g full fat coconut milk

The Perfect Christmas Dinner Dessert!!

Combine 225g cashews, (unsealed) coconut oil, espresso, salt and 1 tablespoon maple syrup in the food processor and blitz until finely chopped.

Line an 8-inch tart tin with parchment paper. Press the crust mixture into the bottom using the back of a spoon and set aside.

Then combine the remaining 225g of the cashews (soaked for 30 mins in boiling water), the last 3 tbsp maple syrup, cacao powder and coconut milk and blend in a food processor until totally smooth. Pour the filling into the crust and refrigerate for at least two hours before serving. This can be topped with berries or banana to serve for a fruity twist.

CHOCOLATE FUDGE PROTEIN SHAKE

1 tbsp protein powder (vanilla or chocolate)
1/2 -1 ripe avocado (depending on size)
125 ml almond milk (unsweetened)
125ml water
2 tbsp unsweetened cocoa powder
4 ice cubes
1/2 tsp Stevia
1/2 tsp vanilla extract
1 tbsp ground flax

Pop all the ingredients into a blender and whizz until smooth.

OVERNIGHT OATS WITH ALMOND BUTTER CACAO NIBS

200ml almond milk
2 tbsp chia seeds
65g oats
2 tbsp cacao nibs
1 tbsp unsweetened desiccated coconut
1 heaped tbsp almond butter
1 tbsp maple syrup
pinch of sea salt

In a wide-bottomed jar or portable container, pour in the almond milk, chia seed, oats, cacao nibs, coconut, almond butter, maple syrup, and a pinch of sea salt.

Give the mixture a good stir to incorporate the almond butter. Put the lid on and keep in the fridge overnight and they're ready to go for breakfast.

(HEALTHIER) CHOCOLATE BISCUITS

There is some brown sugar in this recipe but this is the lowest amount possible while trying to still make these cookies taste good!

2 tsp vanilla extract
1 large egg
4 tablespoons dark brown sugar, lightly packed
66g coconut oil
135g oats
1/2 tsp baking soda
1 tsp cinnamon
Pinch of salt
90g dark chocolate chips
Coarse sea salt

Blend the oats in a food processor until they resemble flour.

Combine the vanilla extract, egg and brown sugar in a bowl. Melt the coconut oil and let it cool slightly before adding to the bowl. Beat everything together until just combined. Stir in the oat flour, baking soda, cinnamon and salt. Stir until just combined and then fold in the dark chocolate chips.

Chill the dough for at least one hour in the fridge. Preheat the oven to 180°C. Break off a little of the dough and roll into a ball. Press a few more chocolate chips in the tops if desired.

Bake for 8-10 minutes or until lightly browned around the edges. Remove from the oven and rest on the baking sheet for another 2 minutes before removing to a wire cooling rack.
